BITTO

Pure quartz
Pure luxury

Bitto Group is a professional and experienced enterprise Group which specializes in R&D, processing, manufacturing and selling quartz stone, solid surface. Bitto enterprise group owns 3 factories, Guang Dong Bitto New Material Technologies Co., Ltd, Hubei Bitto Building Material Technology Co., Ltd, JiangXi Lexton Industry Co., Ltd, covering an area of more than 360,000 square meters in total. With the development of 20 years, Bitto Group has become a well known brand in China and also achieves good reputation in both home and abroad. The annual output is 1,000,000 square meters of solid surface, 3,000,000 square meters of quartz surface.

BITTO is equipped with advanced production equipment, among of which, 12 automatic assembly lines are our core processes, What's more, BITTO is a modern scientific and technological enterprise with strong technical force, large factory area and unique strength in the global quartz surface material industry.

Honor witnesses quality, while strength boosts influence. BITTO has a number of invention patents, and has passed ISO9001 international quality system certification, NSF food safety certification in the United States, SGS antibacterial environmental protection and fire safety certification in Switzerland, and obtained the certification of "Global Certified Quality Manufacturer". BITTO has won more industry recognition by virtue of its good reputation and fast-growing enterprise strength.

After 20 years of hard work and precipitation, BITTO is highly affirmed and widely praised by industries, markets and experts frequently. BITTO's staff will remain true to the original aspiration adhere to the "artisan spirit" and the concept of "creating a better life for mankind" and make joint efforts to make BITTO to be an excellent brand of high-end surface materials in the world.

BITTO

Nano-ink Tech Quartz

NATURAL CARRARA QUARTZ

Nano-ink Tech Quartz series features products treated primarily with nano-ink technology. This innovative treatment enhances the surface with microscopic precision, ensuring a durable and vibrant finish. Nano-ink technology not only enriches the aesthetic appeal of each piece but also provides enhanced resistance to stains and scratches. Ideal for both residential and commercial applications,

Product parameters

SPECIFICATION AND QUALITY STANDARDS			
Inspection items	Quality inspection standards	Inspection standards	Inspection method
Length	Length error	±0.3 %	Steel tape measurement
Width	Width error	±0.2 %	Steel tape measurement
Thickness	thickness error	±0.5 mm	Steel tape measurement
Diagonal	Diagonal error	≤ 10mm	Vernier caliper measurement
Evenness	Flatness error	≤0.6mm	Steel tape measurement
Edge unevenness	Deviation of non straightness at the edge of the board	≤ 1.5mm/m	Steel tape measurement

APPEARANCE QUALITY STANDARDS		
Inspection items	Quality inspection standards	Inspection items
Sand holes Bubble Pockmarks	No obvious sand holes, hemp particles, or bubbles with a diameter greater than 1mm are allowed; ≤ 3 allowed for diameters ≤ 1mm; ≤ 8 allowed for diameters ≤ 0.6 mm, with intervals of more than 300mm	Visual inspection+steel tape measurement
Scratch	No obvious scratches allowed	visualization
Flaw	not allow	visualization
Chromatism	Color difference is not allowed for the same batch of boards	Direct visual inspection under 600mm natural light
Miscellaneous cluster Chromophore	No more than 2 impurities larger than 0.4 mm2 are allowed, and the distance between the two impurity particles is not less than 300 mm.	Visual inspection+steel tape measurement
Paste repair	not allow	visualization
Gloss	45-60 degrees	Glossiness meter measurement

PACKAGING QUALITY STANDARDS		
Inspection items	Quality inspection standards	Inspection method
marking	Inspection items	visualization
protective film	1. The printing position on the back of the board must be centered; 2. Clear handwriting and uniform size; 3. No missed spraying, excessive spraying, or spray code errors are allowed;	visualization
Paper packaging	Smooth and wrinkle free, with no missing edges.	visualization
Glue accessories	The color and quantity of the glue are appropriate, and the label on the glue bottle is correct and clear	check
